Lab # 1

Simple program to familiarize with Program Code, Rebuild & Start Without Debugging

Execute the programs below:

PART 1:

i. Part A: Adding and Subtracting Integers

```
TITLE Add and Subtract (AddSub.asm)

; This program adds and subtracts 32-bit integers
; Authors:
; Date:
; Revision:

INCLUDE Irvine32.inc

.data
TOTAL dword 0 ; a variable named TOTAL (declared as DWORD)

.code

main PROC

    mov eax, 123400h ; Set EAX with the value of 123400h
    add eax, 567800h ; Add the content of EAX with 567800h
    sub eax, 77700h ; Subtract content of EAX with 77700h
    mov TOTAL, eax ; Store content of EAX to TOTAL

    call DumpRegs

    exit
main ENDP

END main
```

Experimental Results:

a) Rebuild & Start Without Debugging

Completed Fully Partially : Checked by: _____

ii. Part B: Adding Variables

```
TITLE Add and Subtract, Version 2 (AddSub2.asm)

; This program adds and subtracts 32-bit unsigned
; integers and stores the sum in a variable.
; Authors:
; Date:
; Revision:

INCLUDE Irvine32.inc

Detail Debugging Process

PART 2:

Run Debugging Process for Part B, Part C and Capture Video

1. Press F10 for step by step debugging.

3. Open 5 windows:

- Watch
- Autos
- Memory
- Registers
- Disassembly

4. Default memory data segment value is at first variable: &val1 or 0x00405000 (depend on memory used).

5. Add variables val1, val2, val3 and finalval to Watch

Watch 1		
Name	Value	Type
val1	0x00010000	unsigned long
val2	0x00040000	unsigned long
val3	0x00020000	unsigned long
finalVal	0x00000000	unsigned long

6. F10 to trace/step the assembly program line by line.

7. Please debug by looking at value changes at Watch, Memory, Autos and Registers windows.

8. Disassembly window can show the following optional information:

- Memory address where each instruction is located. For native applications, it is the actual memory address. For Visual Basic or C#, it's an offset from the beginning of the function.
- Source code from which the assembly code derives.
- Code bytes, that is, the byte representations of the actual machine or MSIL instructions.
- Symbol names for the memory addresses.
- Line numbers corresponding to the source code.

What is Byte Code (or Machine Code) for the following assembly instructions:

```
mov ax, valw1 ; start with 10000h
add ax, valw2 ; add 40000h
sub ax, valw3 ; subtract 20000h
mov finalValw, ax ; store the result (30000h)
```

Byte Code:

```
mov ax, valw1; start with 10000h
00323660 mov ax, word ptr [valw1 (0326000h)]
add ax, valw2; add 40000h
00323666 add ax, word ptr [valw2 (0326002h)]
sub ax, valw3; subtract 20000h
0032366D sub ax, word ptr [valw3 (0326004h)]
mov finalValw, ax; store the result(30000h)
00323674 mov word ptr [finalValw (0326006h)], ax
call DumpRegs; display the registers
0032367A call _DumpRegs@0 (03210E1h)
```

Lab 1 Submission

Due: 6 May 2023 (Saturday: 23.59pm)

This is considering as a group submission. Each group requires ONLY 1 submission.

1. Screen capture results part 1(a), (b), (c) - Start Without Debugging

2. Code Submission

i) Zip both your exercise folders;

- [Lab 1a]
- [Lab 1b]
- [Lab 1c]

ii) Combine into ONE (1) zip file name "Lab1.zip".

iii) Upload "Lab1.zip" file to e-learning under [Labs Submission] section

2. Prepare a video demo for debugging process Lab 1(b) and Lab 1(c) – Start Debugging. If your group consists of 3 students, must do Lab 1(a). Each student should explain one debugging process.

Requirement for the video:

- Video duration is about 10 to 15 minutes
- You MUST explain verbally on how you execute this Lab 1 in the video (... show your face in recording, please 😊)
- The video can be recorded in any tools that you're comfortable
 - Example; you may use any online meeting tool like Zoom, Google Meet, MS Teams to record your lab demo.

3. Video Submission

Demo video can be submitted in two options:

a) as an .mp4 video file (to be uploaded to e-learning) – this is not preferable if the size is big.

OR

b) Upload your video to your YouTube account and share the YouTube video link in the submission option. Set your YouTube video unlisted video (i.e. only person who has the link can see the video)

- Upload OR share the YT video link to e-learning under [Lab Submission] section.

Method (b) is the most preferable.
